

Lakshani Kaveesha

Software Engineer Intern

lakshanikaveesha203@gmail.com | +94 703490456 | Colombo,Sri Lanka
Lakshani Kaveesha | lakshani281 | Lakshani Kaveesha | Portfolio

Profile

Computing and Information Systems undergraduate with hands-on experience in full-stack software development and building real-world applications. Proficient in Java, Python, JavaScript, TypeScript, React, React Native, Node.js, FastAPI, and database technologies, with a strong foundation in Object-Oriented Programming (OOP), RESTful APIs, data structures, and software engineering principles. Experienced in developing scalable and maintainable frontend and backend solutions. Seeking a Software Engineer Internship to apply technical skills, gain industry experience, and contribute to high-quality software development projects.

Education

BSc (Hons) in Computing and Information System 2024 – Present
Sabaragamuwa University of Sri Lanka
Current GPA - 3.2

G.C.E. Advanced Level - Physical Science Stream (2022) 2020 – 2022
H/Ruhunu Vijayaba College

Skills

Technical Skills

- Languages: Java, Python, JavaScript, TypeScript, C,PHP
- Frontend: React.js,React Native, HTML5, CSS3, Tailwind CSS
- Backend & APIs: Node.js, Express.js, FastAPI, RESTful APIs
- Databases: MySQL, MongoDB
- Tools & Concepts: Git, GitHub, Docker, OOP, JWT, Postman
- UI/UX & Design: Figma, Adobe Photoshop

Soft Skills

- Problem Solving , Team Collaboration , Analytical Thinking , Adaptability , Communication , Time Management , Critical Thinking

Projects

Lumora Clothing – Full-Stack E-Commerce & Store Management Platform
Technologies: TypeScript, React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, JWT

- Architected a responsive full-stack e-commerce platform using React.js, TypeScript, Node.js, and Express.js with dynamic product catalog filtering, persistent cart management, and slip-based checkout workflows.
- Developed a role-based Admin Dashboard for product and inventory management, enabling non-technical staff to manage stock and product uploads without developer assistance.
- Implemented secure RESTful APIs with JWT authentication, MongoDB/Mongoose data management, and automated email notifications to support reliable order and store management workflows.

CareVision LK – AI-Powered Patient Monitoring & Safety System | (Group Project) | Contribution: Frontend Development & UI/UX Design
Technologies: React.js, Python, FastAPI, MySQL, OpenCV, YOLOv8, Face Recognition

- Developed a centralized React.js dashboard for real-time patient monitoring, AI-driven safety alerts, event management, and reporting across multiple monitoring sources.
- Integrated the frontend with FastAPI backend services and MySQL to manage real-time event data and support multi-camera monitoring workflows.
- Contributed to system integration, notification workflows, UI/UX development, performance optimization, and concurrent multi-camera testing to improve real-time monitoring reliability.

SafeRide – School Van Transport & Safety System | (Ongoing)
Tech Stack: React Native, Expo Router, TypeScript, Node.js, Express.js, MongoDB, REST APIs, JWT, GPS Tracking

- Built a cross-platform full-stack school transport management system using React Native, TypeScript, Node.js, and Express.js with real-time GPS fleet tracking and route monitoring.
- Developed automated student attendance, dynamic route summaries, safety event notifications, and configurable speed-alert threshold monitoring for improved transport visibility.
- Implemented secure RESTful APIs with JWT authentication and Role-Based Access Control (RBAC), connecting Driver Apps, Parent Portals, and Admin Dashboards.

EmergencyX – Real-Time Emergency Response Platform | (Ongoing)
Technologies: React.js, Node.js, Express.js, MongoDB, Socket.io, Maps API, Tailwind CSS, JWT

- Developing a location-aware full-stack emergency response platform connecting citizens, volunteers, and response teams through real-time communication and incident management.
- Implementing real-time SOS alerts, incident reporting, interactive maps, live status updates, and Socket.io-based communication for rapid information sharing.
- Designing secure JWT authentication and role-based workflows with RESTful APIs and MongoDB to support coordinated emergency response operations.

DevGuard AI – AI-Powered Secure Code Review Platform
Technologies: Python, FastAPI, React.js, TypeScript, PostgreSQL, Semgrep, OpenAI API, Docker

- Developing an AI-powered secure code review platform using Python, FastAPI, React.js, and TypeScript to identify security vulnerabilities, hardcoded secrets, and code quality issues.
- Integrating Semgrep static analysis with OpenAI API to generate contextual vulnerability explanations, risk insights, and remediation guidance.
- Building a security dashboard with PostgreSQL for scan results, severity tracking, risk analysis, and automated security report generation, containerized using Docker.

Certificates

ReactJS Projects for Beginners
Simplilearn

Code Java in 5 Hours
Udemy

Introduction to Golang
Simplilearn

Mastering Video Editing with AI ChatGPT for Content Creators
Udemy

Photoshop & E-Business Marketing
Royal ICT

IT & Microsoft Office Specialist
Royal ICT

Achievements

Grand Finalist – HACKORA Hackathon 2026

1st Runner-Up – Xmasora Inter-University Flyer Designing Competition 2025

Semi-Finalist – Hack Like a Girl 3.0

Finalist – J'Pura Xtreme Programming Competition 3.0

Finalist – Designathon, PearlHack 4.0

Most Popular Article Award – Edify Inter-University Article Competition 2025

Top 20 Finalist Team – CRYPTX Designathon Competition

Volunteering

Public Relations Committee 2024 – Oct
Student Volunteer
Faculty of Computing, Sabaragamuwa University of Sri Lanka
